

Filter Set ND-PL PGYTECH for DJI Mavic 3 Pro (P-43A-034)

Ref: 6976100482296

Filter Set ND-PL PGYTECH for DJI Mavic 3 Pro (P-43A-034)

PGYTECH ND-PL Filters for DJI Mavic Pro (P-43A-034)

Introducing the PGYTECH ND-PL filter set for the DJI Mavic Pro, a perfect choice for drone photography and videography enthusiasts. These innovative filters combine lightweight construction with durability, ensuring unparalleled image quality without impacting the drone's performance. Perfectly tailored to meet the needs of both professionals and amateurs, PGYTECH filters allow you to capture clear images in bright environments, providing exceptional control over light and colors.

Multi-Layer Protection

Each PGYTECH ND-PL filter is equipped with a double-sided, multi-layer coating that is resistant to water, oil, and scratches. This ensures that the filter maintains its clarity and effectiveness even in challenging conditions while providing protection for your lens.

Professional Optical Glass

PGYTECH filters are crafted from Japanese professional optical glass from AGC, which undergoes multiple grinding and polishing processes. This guarantees a clear and sharp image, allowing you to capture details with high clarity.

Lightweight and Durable

PGYTECH ND-PL filters are incredibly lightweight, weighing only 8.5g each, yet exceptionally durable due to the use of aluminum and

optical glass. Their lightweight design does not affect the drone's calibration or performance, which is crucial for maintaining flight stability.

Light and Color Control

The set includes ND-PL filters 8, 16, 32, 64, allowing for a wider aperture, shallower depth of field, extended exposure time, and reduced reflections on metallic surfaces. This provides excellent control over light and colors in all conditions.

Package Contents

ND-PL Filters

Brand

PGYTECH

Compatibility

DJI Mavic Pro

Material

Aluminum, optical glass

Weight

8.5g x 4 + packaging
