

Camera Wrist Strap PGYTECH (Oak Grey)

Camera Wrist Strap PGYTECH (Oak Grey)

Ref: 6976100482074

PGYTECH Wrist Strap for Camera (Gray)

The PGYTECH wrist strap is a high-quality accessory that allows the user to focus on creating interesting shots with peace of mind.

High-Quality Material

Dyneema Fabric is a fibrous, polyethylene material that is lightweight, durable, and long-lasting - thanks to its properties, it is 15 times stronger than steel. Additionally, the microfiber layer used makes the strap even more comfortable to use, as it is skin-friendly, breathable, and flexible. The wrist bumps on the inner side of the strap positively affect the fit to the wrist.

Quick Connection

The hidden magnetic closure allows you to easily transform the strap into a bracelet when it's not needed temporarily. Furthermore, with the help of one hand, you can easily adjust the strap's width to your own wrist by tightening the metal clip. If you accidentally drop the camera, the strap tightens automatically.
