

Solar Panel for Outdoor Spotlight Cam

Solar Panel for Outdoor Spotlight Cam

Ref: 850043739500

Solar panel for SwitchBot Outdoor Spotlight Cam

With the SwitchBot Solar Panel for Outdoor Spotlight Cam, you will provide your Spotlight Cam with continuous power without the need for regular charging. Operating regardless of weather conditions and rainproof, it is ideal for outdoor surveillance systems. Its performance in temperatures from -20°C to 50°C guarantees reliability in all conditions.

Easy installation and placement flexibility

Mounting the solar panel is intuitive and simple, and the included mounting bracket provides an adjustable angle for optimal solar catch. The 3-meter USB-C cable gives you the freedom to choose the panel's mounting location for optimal sunlight harvesting.

Eco-friendly and efficient solution

Using a solar panel is a step towards an eco-friendly and sustainable lifestyle. Not only does it reduce your dependence on the electric grid, but it also lowers the cost of operating the camera. The SwitchBot solar panel is an investment that pays for itself quickly, while taking care of the environment.

High quality and durability

Made of durable ABS material and designed to be IP55 weatherproof, the SwitchBot solar panel is made for long-term use. Its lightweight

design (173 g) and compact dimensions (116 × 169 × 14 mm) make it an unobtrusive and aesthetically pleasing addition to your surveillance system, so your camera won't let you down at crucial moments.
