

## SwitchBot Lock

SwitchBot Lock

Ref: 850043739234

### SwitchBot Lock smart door lock

SwitchBot Lock is a smart door lock that will transform your home security and comfort experience. It allows you to open and close your door in 9 ways - including remotely. Open up to smart solutions and let them make your life easier. SwitchBot Lock is compatible with most European locks, and it's a pleasure to install - everything you need for a quick and easy installation is included.

### Automatic door opening and closing

The lock puts before you the possibilities of automatic opening and closing of the door. It's a solution that will work perfectly in situations when you have your hands full of shopping or just want to enter the house without having to look for keys. With just one gesture, a voice command or a button on the app, you can control the door. It's a feeling of convenience you won't want to give up.

### Support for voice assistants

SwitchBot Lock supports popular voice assistants such as Google Assistant, Amazon Alexa, Siri and others. This allows you to open and close doors with simple voice commands. Imagine coming home and being able to say, "Close the door," and the lock obediently does so. This is not only convenient, but also safe, because you don't have to worry about losing your keys.

You will open the door in 9 ways

This product is not only a smart, but also a versatile lock. It offers as many as 9 different ways to open the door. You can choose among them the one that best suits your lifestyle. Voice command, in-app click, fingerprint, NFC card, access code, remote control, NFC tag, traditional key and even Apple Watch - the choice is yours. It's flexibility that adapts to your needs.

#### Battery monitoring

SwitchBot Lock also takes care of battery monitoring. This ensures that you won't forget to replace it. When the power level reaches a minimum, you will immediately receive a notification on your phone, so you can always be sure that the lock is running smoothly and reliably.
