

Intelligent activator SwitchBot Tag

Intelligent activator SwitchBot Tag

Ref: 850007706586

SwitchBot Tag smart activator

Get full control over your home, no matter where you are! SwitchBot Tag is a smart activator with an NFC module that allows you to conveniently control your SwitchBot devices. It features 3M tape for easy installation and secure attachment in multiple locations.

Smart automation

Did you forget to turn off the lights when leaving for work in the morning? Or do you wish the air conditioning was already on when you get home? Now it's possible! A smart activator with an NFC module will allow you to freely control all your SwitchBot devices. Open the blinds, close the curtains, turn on the lights, start the fan or other devices - with just a press of a button on the app on your smartphone.

Easy to use

Activating the SwitchBot Tag is extremely easy - just touch the appropriate area of your phone with the SwitchBot Tag (at a distance of 0.5 to 2 cm). With the SwitchBot Hub Mini (available for sale separately), you'll gain the ability to create scenes, or pre-programmed sequences of actions in the SwitchBot app that allow you to operate multiple devices with a single touch.
