Sonický zubní kartáček se sadou špiček a cestovním pouzdem D2 (černý)

Sonic Toothbrush with Set of Tips and Case Bitvae BV E11 (Black)

Bitvae BV E11 is more than just a regular toothbrush; it's a comprehensive solution for a healthy smile. Offering various brushing modes tailored to different needs, this sonic toothbrush combines advanced technology and user comfort. In the kit, you will find everything you need, from a case to interchangeable tips, ensuring hygiene and convenience anytime, anywhere.

"White" Mode - Whitening with a Smile

"White" mode is designed for those who desire naturally whiter teeth. Thanks to the specially designed brush movements, it removes surface stains, restoring your teeth's natural brilliance. Regular use of this mode can significantly improve the appearance of your smile, making it brighter and more radiant.

"Clean" - Strong Action for Dental Health

"Clean" mode is the essence of effective oral hygiene. It is the most powerful mode of the Bitvae BV E11 toothbrush, ideal for daily thorough cleaning of teeth and interdental spaces. It removes plaque more effectively than traditional brushes, supporting the maintenance of healthy teeth and gums.

"Sensitive" - Gentleness for Sensitive Teeth

"Sensitive" mode is a solution for people with sensitive teeth and gums. It provides gentle yet effective cleaning, minimizing discomfort during brushing. With it, even individuals with sensitivity issues can enjoy thoroughly cleaned teeth without the fear of pain.

#### "Polish" - Polishing for Extra Shine

"Polish" mode is designed to give your teeth an extra shine. It's ideal for use after the "White" mode to enhance the whitening effect. With it, your teeth become smooth and glossy, making your smile even more dazzling.

#### "Massage" - Healthy Gums with Gentle Stimulation

"Massage" mode focuses on gently massaging the gums, which is crucial for their health. Regular use of this mode helps maintain healthy gums, preventing issues such as gum inflammation or bleeding.

#### Practical Features for Daily Convenience

In addition, the Bitvae BV E11 toothbrush offers practical features such as notifications every 30 seconds to change the brushing side, making it easier to evenly clean all teeth. The kit includes a travel case, eight interchangeable tips, and a USB-C cable, providing full user convenience, both at home and on the go.
