TWS Haylou GT1 2022 Headphones

Enjoy excellent sound quality and a reliable wireless connection. The TWS Haylou GT1 2022 headphones are equipped with 7.2mm drivers and support the AAC codec to surprise you with crystal clear sound. Bluetooth 5.2 lets you forget about latency, and the durable battery provides up to 20 hours of use with the charging case. The headphones are also extremely lightweight and comfortable, with built-in touchpads for easy operation.

Reliable connection

The all-new Bluetooth 5.2 chip provides a more stable connection, faster transmission and greater resistance to interference. Pairing the GT1 2022 is incredibly easy - just take them out of the case! What's more, each earpiece connects to the device independently, allowing you to conveniently use both at the same time, or just one, left or right. There's also a gaming mode with a latency of just 65ms. This is the perfect option for gaming enthusiasts! The headphones are compatible with Android and iOS.

Stunning sound

What makes the GT1 2022 headphones play so well? Dynamic 7.2mm drivers with composite diaphragms and advanced AAC HD audio codec let you enjoy crystal-clear sound, rich detail, perfect harmony and extended sound field. Accentuated, deep bass and crisp, ear-pleasing treble will have you discovering your favorite songs in a new, better quality!

They're perfect for conversations

Looking for headphones that deliver great sound quality not only when listening to music, but also when talking on the phone? Haylou GT1 2022 will be an excellent choice! The artificial intelligence noise-cancellation function and the state-of-the-art DNN algorithm will let you talk freely with your friends even in extremely noisy environments. The headphones intelligently recognize your voice and cut out unnecessary external sounds, giving you the confidence that your interlocutors can hear you perfectly.

Long-lasting battery

Listen to music for as long as you want, at home, at work or on the move. Don't worry if your headphones run out of power too quickly! Thanks to their long-lasting batteries, GT1 2022 can be used for about 5 hours on a full charge. In addition, the included carrying case can extend this time to up to 20 hours. Its convenient charging is enabled by the built-in USB-C port.

Incredibly comfortable

Find out just how comfortable wireless headphones can be. GT1 2022 have been equipped with special silicon ear holders thanks to which they stay firmly in place and do not fall out - even when you move a lot or exercise. They are also pleasant to the touch and do not exert unpleasant pressure. What's more, each earphone weighs just 3.9g. You'll also find 3 pairs of rubber bands in 3 sizes - S, M, and L (the M size rubber bands are already mounted on the headphones).

Built-in touch panels

Operating the GT1 2022 is extremely easy and convenient. The headphones have built-in touch panels so you can easily use their most important functions. With just a few taps, for example, you can switch songs, pause / resume playback, answer the phone, reject a call, hang up, activate low-latency mode, or activate the voice assistant. No more searching for your smartphone every time - now everything you need is at your fingertips!
