

Air conditioning/heat pump smart controller Sensibo Sky (white)

Ref: 7290016037159

Air conditioning/heat pump smart controller Sensibo Sky (white)

Intelligent Air Conditioning/Heat Pump Controller Sensibo Sky White

The Sensibo Sky, a modern air conditioning and heat pump controller, is the perfect solution for those seeking practical, effective, and comfortable solutions. This sleek controller connects to Wi-Fi, offering not only full control over your air conditioning from anywhere but also energy savings, customization to user needs, and integration with popular voice assistants.

Full Control and Convenience

The Sensibo Sky provides full control over the air conditioning, allowing access to all modes, fan levels, and LED lighting. Through the mobile app, users can easily manage air conditioning settings from anywhere.

Energy Savings

The Sensibo Sky can save up to 40% of energy. Thanks to intelligent algorithms and the Climate React feature, the device automatically adjusts the temperature, ensuring energy efficiency without compromising on comfort.

Geofencing for Intelligent Adaptation

Geofencing is a feature that uses geolocation to automatically adjust the temperature based on the user's proximity to home. This intelligent solution ensures that the home is always comfortably heated or cooled when the user approaches.

Monitoring and Activity Logs

The Sensibo Sky offers daily charts and logs that track temperature, humidity, and user activity. This data helps optimize settings for maximum comfort and efficiency.

Intelligent Automation

The controller responds to schedules and geofencing, automatically adjusting air conditioning settings for maximum comfort and energy savings. The Pure Boost feature allows for a temporary increase in cooling or heating power, providing quick comfort in situations that require an immediate response.

Key Features

The Sensibo Sky offers filter cleaning reminders, contributing to improved device performance, longevity, and indoor air quality. By collaborating with voice assistants such as Google Home, Amazon Alexa, Apple Siri, SmartThings, IFTTT, and an open API, the Sensibo Sky becomes an integral part of a smart home, adapting to user needs and preferences.
