Esperanza EGP101R Gaming mouse pad

Ref: 5901299927977

Esperanza EGP101R mouse pad for gamers

Designed with gamers in mind, the high-quality Esperanza EGP101r mouse pad is the essence of modernity and durability. Compatibility with different types of mice, combined with precise fiber placement for better control, makes it an ideal choice for any gamer. Its black and red design and optimal dimensions of 250 x 200 x 2mm blend perfectly with any hardware configuration.

Compatible with laser and optical mice

The Esperanza EGP101R mouse pad provides exceptional compatibility with both laser and optical mice. This versatility ensures that regardless of your preferences and the mouse you own, you will experience smooth and uninterrupted gaming. Precise tracking of mouse movements on this mouse pad significantly improves gaming performance.

Exceptional control and speed of movement

The key advantage of the Esperanza EGP101R mousepad is the way the arrangement of the fibers affects the control and speed of mouse movements. This characteristic allows gamers to have the quick response and precision needed in dynamic gaming scenarios. Optimal surface friction provides a balance between speed and control, which is crucial for satisfactory performance.

Non-slip rubber on the bottom

Safety and stability during intense gaming is ensured by the non-slip bottom of the mousepad. Made of high-quality rubber, it prevents the mousepad from moving, even during the fastest and most vigorous mouse movements. This stability is especially important in situations where every millimeter of mouse movement matters.
