

Esperanza EMV300 3D VR glasses for 3,5-6 inch smartphones

Ref: 5901299926406

3D VR glasses for 3,5-6 inch smartphones Esperanza EMV300

Esperanza EMV300 3D VR Glasses for 3.5-6 inch Smartphones

Esperanza EMV300 is a revolutionary 3D VR glasses that take the virtual reality experience to a whole new level. With them, you can enjoy 3D movies and VR games directly on your smartphone. Compatible with devices ranging from 3.5 to 6 inches, both Android and iOS systems, Esperanza EMV300 goggles offer incredible comfort and image quality. Equipped with aspherical lenses providing naturalness and depth of image, adjustable mounting straps, a sliding cover for AR games, and ventilation holes, these glasses are a real treat for any VR enthusiast.

Naturalness and Image Depth: Aspherical Lenses

Esperanza EMV300 utilizes 40mm aspherical lenses, providing sharpness and clarity of image without distortion. As a result, the virtual reality experience becomes more realistic and immersive. Bidirectional lens adjustment (up to 10mm distance and 55-72mm interpupillary distance) allows customization to the user's individual needs, ensuring maximum comfort and image quality.

Comfort and Fit: Flexible Straps and Protective Cover

The EMV300 goggles are designed with user comfort in mind. Flexible straps ensure safe and stable positioning of the glasses on the head, while a protective cover made of high-quality artificial leather and elastic sponge perfectly conforms to the shape of the face. Additionally, thanks to this design, VR glasses can be used without the need to remove prescription glasses.

Practicality: Ventilation Holes and Sliding Cover

Esperanza EMV300 also takes user comfort into account from a practical standpoint. Ventilation holes prevent lens fogging, while a sliding cover allows easy use of the phone's camera in AR games (Augmented Reality). Cutouts on the sides of the goggles allow easy connection of headphones and smartphone charging cable, ensuring uninterrupted entertainment.

Versatility: Compatibility with Android and iOS

Esperanza EMV300 glasses are compatible with a wide range of smartphones, supporting both Android and iOS systems. This makes them an ideal solution for everyone, regardless of the type of device they own. Whether you have an iPhone or an Android smartphone, you can enjoy virtual reality at the highest level.

Prepared for Entertainment: Perfect for VR Games and 3D Movies

Esperanza EMV300 is not just technology, but also unlimited fun. Download VR games and movies from the APP Store or Google Play Store and enjoy an unparalleled virtual reality experience. Solid construction, easy smartphone assembly, and the ability to use gyroscope functions in modern smartphones make these VR glasses ideal for any gaming and 3D movie enthusiast.
