Esperanza TM105K Titanium Wireless mouse (black)

Esperanza TM105K Titanium Wireless Mouse (Black)

The Esperanza TM105K Titanium Wireless Mouse is a great choice for desktop and laptop users seeking a combination of comfort, performance, and durability. Equipped with advanced 2.4GHz technology, this mouse offers exceptional working range up to 10m, providing freedom of movement without cable restrictions. Variable resolution (800/1200/1600 DPI) allows precise adjustment of sensitivity to user needs, which is especially useful in various applications and games. The lightweight and ergonomic design, enhanced with a quiet scrolling wheel and high-quality material, ensures comfortable use for long hours.

2.4GHz Wireless Technology

One of the key features of the Esperanza TM105K mouse is its 2.4GHz wireless connectivity, ensuring reliable connection and an impressive range of up to 10 meters. This allows users to enjoy freedom of movement without cable restrictions, which is invaluable in office work, presentations, or home entertainment media usage. Additionally, the small, difficult-to-damage NANO receiver is easy to transport and saves space, making the mouse ideal for frequent travelers.

Resolution and Precision

Another important feature of the mouse is the ability to change the working resolution (800 / 1200 / 1600 DPI), allowing users to adjust the mouse sensitivity to the tasks at hand. This feature is particularly useful for gamers and professionals working in applications

requiring precise cursor movement, such as graphic or editing programs. Flexibility in resolution ensures that the mouse performs well in any working conditions.

Ergonomics and User Comfort

The Esperanza TM105K is designed with ergonomics and user comfort in mind. Its shape perfectly fits the hand, preventing fatigue even after many hours of work. Two additional side buttons ("Next" and "Previous") facilitate navigation in web browsers and other applications, which is a great convenience, especially during intensive work. The mouse is also lightweight (weighing only 60g) and has compact dimensions (100mm x 60mm x 36mm), further enhancing user comfort.
