

## Rojeco Interactive Cat Ball (green)

Rojeco Interactive Cat Ball (green)

Ref: 6975116293858

### Interactive Cat Ball by Rojeco (Green)

Provide your cat with healthy entertainment and the necessary dose of exercise with the help of Rojeco. The interactive ball is designed to cater to the needs of cats with various temperaments, offering up to 3 operating modes. The toy rotates 360° at speeds of up to 16,000 RPM, intelligently avoiding obstacles and providing colorful LED lighting, thereby stimulating the hunting instinct and ensuring your pet's fitness. Moreover, the 180mAh battery provides up to 4 hours of uninterrupted play on a single charge.

### Hassle-Free Entertainment

Operating the Rojeco interactive ball is a breeze – simply press the button for 3 seconds to activate the toy, which will capture your cat's attention with flashing LED lights and movement. A short press allows you to switch between play modes, allowing you to customize the device's behavior to match your pet's mood and preferences.

### 3 Play Modes

The Rojeco toy offers 3 interaction modes: Passive, where it jumps in place from 1 to 5 cm in height, Gentle, during which it moves along the floor, and Move and Jump, which combines movement and jumping. All modes are designed to cater to different levels of activity and encourage your cat to jump, run, and catch. The variety of stimulation helps maintain your pet's mental and physical health.

### Intelligent Obstacle Avoidance

Thanks to the use of sensors, the Rojeco interactive ball automatically avoids obstacles, preventing collisions and damage. This makes it an ideal solution for busy owners who want to provide their cats with safe play even in their absence.

### Up to 4 Hours of Continuous Play

The 180mAh battery provides from 2 to 4 hours of continuous play. In standby mode, the ball can last up to 24 hours, and activating it is as simple as a single touch. USB charging takes about an hour, so your pet won't have to wait long for another dose of entertainment. Practical LED indicators will inform you about the device's status - a red light indicates the need for a recharge, while a green light means the battery is fully charged.

### Thoughtful Design

The ball intelligently goes into standby mode after playtime, minimizing energy consumption and ensuring readiness for the next session. This solution also extends the battery life. The toy is made of high-quality silicone, guaranteeing durability even during intense use. The material used is safe for your cat, and the option to wash it makes it easy to provide hygienic conditions for your pet during playtime.
