

Waterproof temperature sensor Sonoff WTS01, RJ9 4P4C (THR316

Vodotěsný snímač teploty Sonoff WTS01, RJ9 4P4C (THR316/320)

Ref: 6920075740486

Sonoff WTS01 waterproof temperature sensor, RJ9 4P4C (THR316/320)

Keep everything under control and enjoy convenient access to information about the conditions in your environment. Sonoff's waterproof temperature sensor provides accurate measurements from -40°C to 115°C and features high durability - it will serve you well for a long time. The device works with the Sonoff TH Elite and Sonoff TH Origin relays (sold separately), and is very easy to install.

High accuracy of measurements

The sensor measures temperature in the range of -40°C to 115°C , which means it will work well in many applications. It also stands out for its impressive precision - in the range of -10°C to 85°C it measures with an accuracy of $\pm 0.5^{\circ}\text{C}$.

Refined in every detail

Installation of the sensor will not cause you any problems - just connect it to the Sonoff TH Origin or Sonoff TH Elite relay. The product is also equipped with a long, 1.5-meter cable, which provides greater flexibility and allows you to use it even at some distance from the device to which it is connected. The WTS01 is also resistant to water, corrosion and rust, so you can use it in humid environments without worry.
