The Telesin GP-WTP-801 Waterproof Case for GoPro Hero 8

Are you fascinated by the underwater world and want to capture its beauty in stunning shots? Now it's possible! The Telesin GP-WTP-801 waterproof housing allows you to safely submerge your GoPro Hero 8 camera to a depth of up to 40m. The product features unparalleled durability and is fabulously easy to install. It is also resistant to dirt and fingerprints. It is perfectly matched to the GoPro Hero 8 camera, ensuring its safety underwater.

Capture the beauty of the underwater world

What makes the Telesin housing so perfect for taking underwater shots? When you place your camera in it, it allows you to record at depths of up to 40m. You also don't have to worry about the image quality decreasing. The lens protection element is made of high-quality organic tempered glass, which is not only durable and resistant to damage, but also provides fantastic results when taking underwater shots.

Made for GoPro Hero 8

The housing is a perfect fit for the GoPro Hero 8 camera, and it's quick and easy to install. You don't even have to remove the lens - so you can avoid damaging it. Made of 316 stainless steel, the components are extremely durable and resistant to dirt. Say goodbye to unsightly fingerprints! What's more, the case is designed to widen the surface of the camera button, thus providing it with even more

security.
