3-slot Telesin charger for GoPro Hero 8 + 2 batteries

The GP-BNC-801 kit from Telesin will solve your battery charging problems for your GoPro Hero 8. The charger not only allows you to quickly renew your camera's batteries, but also allows you to store them to prevent loss. With the GP-BNC-801, you can conveniently charge 3 GoPro Hero 8 batteries at the same time, even while traveling, by connecting the accessory to a car charger, powerbank, or computer.

Fast and safe charging

Do you want your GoPro hero 8 to renew its power quickly? With the Telesin charger, it's possible! With a stable 4.3V 800mA voltage, you can charge 3 batteries simultaneously in about 1.5 hours. Red and green indicators will let you know the charging status of each battery. In addition, the charger has a number of safety features to make charging safe. The accessory protects against over-discharge, over-charging, short-circuit, over-current, over-voltage, overheating, etc.

Batteries included

High-density lithium-ion batteries are durable and fit the charger perfectly because of the same dimensions as the original batteries. You can also use them at low temperatures. Recording at 4K30 resolution at -20°C allows you to create about 67min of footage, which is almost the same as the original battery. What's more, the 1220mAh battery capacity (each battery) provides up to 120min of operation.

They are made of fire-resistant material, so it is safe to use.

Charge as you want

The charger has a USB-C port, so you can connect multiple devices to it and charge your batteries. You will renew the battery power for GoPro Hero 8 using a charger, powerbank, laptop, PC, tablet, etc.
