Lefeet C1 Seagull Underwater Scooter

The LEFEET C1 Seagull underwater scooter is a groundbreaking device for underwater adventure enthusiasts. Equipped with two 200W motors, it provides impressive thrust underwater, allowing for unforgettable diving experiences. Its compact and user-friendly modular design ensures not only smooth operation but also easy maintenance. With its dual-motor system, the LEFEET C1 guarantees stability and intuitive handling, making it an ideal choice for both beginners and experienced divers.

Excellent Underwater Performance

The LEFEET C1 allows for smooth speed switching from 1.3 m/s to 1.6 m/s, making it an ideal tool for exploring depths up to 30 meters below the water surface. Its efficient motors enable dynamic and precise movement control, providing not only extraordinary sensations but also excellent performance during dives.

Lightweight and Mobile

Extremely lightweight, weighing just 3 kg, the LEFEET C1 Seagull is a device that you can easily carry anywhere. Despite its small size, this water scooter uses the power of an efficient BLDC motor, translating to reliability and solid performance without compromise. The operating time of the LEFEET C1 ranges from 30 to 60 minutes depending on the speed setting. The quick 5-second battery replacement allows for uninterrupted use of the device. Moreover, the scooter is designed with air travel in mind, complying with regulations (2

additional batteries are allowed in carry-on luggage), making you ready for adventures around the world.

Capture Unforgettable Moments

The built-in camera mount on the LEFEET C1 allows for easy attachment of a GoPro camera, enabling effortless capture of unforgettable underwater moments. Now you can immortalize your underwater discoveries and share them with others. Enjoy the convenience of simple one-click pairing with the LEFEET C1's wireless control system. Experience unmatched ease and precision in maneuvering the underwater scooter, making each dive an unforgettable experience.
