Nicefeel FC5170 water flosser (grey)

Take care of your teeth and impress with a beautiful smile. The Nicefeel FC5170 cordless water flosser will allow you to effectively eliminate debris and offers 4 modes to choose from. It is equipped with a durable 2200mAh battery and is very convenient to use. You can also add your choice of effervescent tablets to it.

Say goodbye to impurities

With a water flosser, you can brush your teeth much more thoroughly than with a normal toothbrush. You can even reach hard-to-reach areas of your mouth and effectively get rid of food debris, plaque and other impurities. The device offers a pressure level of 20-115psi and a power level of up to 5-8W. At the same time, it works surprisingly quietly - don't be afraid of annoying noise!

4 operating modes to choose from

With up to 4 modes available, you can select the ideal setting for your needs. The Standard mode is perfect for everyday use, while the Pulse mode provides a gentle gum massage. Soft will be suitable for beginners and people who have sensitive teeth. There is also a DIY mode that allows you to manually adjust the water pressure. Find the best setting for you!

2 tips included

The included standard nozzle is perfect for everyday use. You will also find a spare nozzle in the pack. You can either keep it for yourself or share it with a loved one so they can use the water flosser too! What's more, the device is equipped with a special compartment for convenient storage of the nozzle.

Improved design

The water flosser's water reservoir has a capacity of 200ml - so you don't have to stop brushing your teeth to fill it up! The product also boasts IPX7 water resistance and is very leak-proof - don't worry about it leaking. In addition, the device is extremely easy and convenient to use. You can also use it in combination with a selection of effervescent tablets - for example, for oral decontamination.

Cordless operation

Free yourself from cables and enjoy greater freedom of movement. The FC5170 is equipped with a powerful 2200mAh rechargeable battery for long working hours. Charging the device with the included USB-C cable will only take around 3 hours. What's more, the portable, cordless design also makes the irrigator great for travelling - take it on holiday without a problem!
