

Irrigator Socas W1

Irrigator Socas W1

Ref: 6970237661531

Socas W1 Dental Irrigator

Care for proper oral hygiene with the irrigator from Socas. The device is equipped with 4 modes and 4 tips, so you can adjust the operation of the W1 to your own needs. The high performance rechargeable battery allows the irrigator to run for up to 90 days, and the level of water resistance ensures freedom of use. Thanks to its compact design, the device won't take up much space in the bathroom, and the included carrying case allows you to conveniently store the irrigator tips.

High efficiency

The toothbrush does not reach everywhere, therefore some area of the mouth is not cleaned. The Socas device works at a high frequency of 1300 strokes per minute, effectively removing food debris from between the teeth. Moreover, thanks to its clever design, it works more effectively than other irrigators, instantly and thoroughly cleaning the oral cavity.

Customize the W1 to your needs

The irrigator is equipped with 4 modes of action, which you can use. The gentle mode will work for beginners or for sensitive gums. For everyday cleaning, use the standard mode that provides effective cleaning. Another mode will be suitable for people with gum disease, which gently massages the gums. While the spot mode can be used by those wearing braces.

4 tips included

Considering the different needs of users, 4 tips are included in the kit. The periodontal tip will work well for gently cleaning the gums. For interdental rinsing, use the standard nozzle, while the orthodontic nozzle makes it easier to clean between braces. In addition, in the package you will also find a nozzle for cleaning the tongue. With Soocas W1 you will take care of comprehensive oral hygiene.

Compact

The Soocas irrigator has a 150ml water reservoir, which helps to reduce the frequency of refilling. However, if the need arises, you can easily remove it and refill the water. The compact design makes the product easy to use and convenient to store.

Convenience of use

Using this irrigator will not cause you any problems. The device is equipped with 2 buttons for switching the W1 on/off or setting the working mode. The 360° rotating nozzles make it easy to use, and the IPX7 water resistance makes it easy to use. Moreover, the wireless power supply positively affects the comfort of use, and the capacious battery allows for about 90 days of work on a single charge. After about 4 hours of charging, the device is ready to use again.
