

## Electric milk frother 4 in 1 HiBREW M3 500W

Electric milk frother 4 in 1 HiBREW M3 500W

Ref: 5907489609128

### 4in1 Electric Milk Frother HiBREW M3

The HiBREW 4in1 milk frother heats milk and froths it hot or cold. You can easily prepare delicious cappuccino, protein powder, hot chocolate or a refreshing drink such as iced coffee. The machine offers 4 temperature settings and is very easy to use. It is made of high quality materials and its cleaning will not cause you any problems.

### Multifunctional

With the M3 milk frother you can prepare lots of delicious drinks. The device offers 4 temperature settings, which are perfect for various applications. The 50-60°C setting is perfect for preparing a protein drink, while the 60-70°C setting will allow you to create the perfect froth for your cappuccino. If you want to make hot chocolate with milk, choose 70-80°C. You can also use the cold frothing function. The foam created in this way will complement iced coffee, for example.

### Large capacity

Use the frother once to prepare enough foam for several drinks. The device stands out for its surprisingly large capacity. You can heat up to 300ml of milk or obtain up to 150ml of froth. And you don't have to worry about pouring too much or too little milk into the milk frother. The special MAX / MIN indicators make it easy to measure the right amount.

#### User-friendly

Operating the milk frother is exceptionally simple. The frother is equipped with a single button for switching it on and off, as well as selecting the desired mode. It also comes with 2 whisks - one to heat the milk and froth it gently, and one for creating thick foam. All it takes is about 90 seconds!

#### Easy to maintain

The appliance is made of high-quality stainless steel with a non-stick coating. You can easily keep it in perfect condition. The brush included in the set makes cleaning easy. The transparent lid of the frother is made of durable PP material which can be used without problems in contact with food.

#### Comfort of use

Don't be afraid of disturbing noise - the milk frother works exceptionally quietly. It is also very convenient to use. It has a specially designed handle which does not heat up and protects users from burns. What's more, the M3 has a small spout that makes pouring the froth easier and allows you to enjoy greater precision when making patterns on your coffee. The device is also protected against overheating and automatically switches off when finished.
