

SPA Massager Body Brush InFace CB-11DL

SPA Massager Body Brush InFace CB-11DL

Ref: 6971308401384

inFace CB-11DL body massage brush (pink)

The inFace CB-11DL body massage brush provides a relaxing massage and gently exfoliates the skin. It comes with 2 tips, so you can use it as you are comfortable. What's more, it offers 3-stage speed adjustment and is IPX7 water resistant.

Effective cleansing

Swap standard bath sponges for inFace. The brush head consists of two parts, and each part rotates in a different direction, providing a pleasant massage and effectively cleansing the skin. In addition, it has a smart chip that will interrupt the device when it detects too much pressure on the skin. This makes using the CB-11DL completely safe.

2 heads included

In the package you will find 2 interchangeable heads that you can use freely. Thanks to the use of DuPont bristles, the brush thoroughly cleanses the skin. What's more, it helps treat acne on the back.

Customize its action according to your needs

The inFace body massage brush offers 3 speed levels, so you can adjust its action to your own needs. The lowest level gently cleanses the skin, the medium level is perfect for everyday use, and the highest level provides thorough cleansing.

Thoughtful design

The inFace CB-11DL is made of FDA silicone, making it safe for your skin. What's more, it has IPX7 splash resistance, so you can use it freely without worrying about damaging the product.

Durable battery

The inFace body massage brush is equipped with a 1000 mAh rechargeable battery, which translates into about 45-90 minutes of use. In addition, the product supports magnetic charging - you can easily remove the battery and renew its energy. After about 2 h, the brush will be ready to work again.
