

## Inteligentný samočistiaci odpadkový kôš pre mačky Catlink Ba

Inteligentný samočistiaci odpadkový kôš pre mačky Catlink BayMax Verzia

Ref: 6972884751177

### Catlink BayMax Lite intelligent self-cleaning cat litter box

The Catlink BayMax Lite intelligent litter box is designed for cats weighing 1.5 - 10 kg. It stands out with a capacity of 65 liters and is fully safe for your pet. What's more, the litter box is compatible with different types of litter, and the app allows you to monitor your pet's health.

### One-button cleaning

Forget about manually cleaning the litter box. The Catlink BayMax Lite has a built-in system that empties the litter box - just hold down the dedicated button for 3 seconds. To remove the waste bag, remove the top cover of the unit. In addition, a dedicated mode (available on the app) makes the litter completely clump the feces and then dumps it into the waste bag.

### Control from the app

Install the Catlink app and monitor your pet's health. The app records every visit to the BayMax Lite and how much time it spends in it. It also provides information about your cat's weight. Note: to gain access to the ability to recognize multiple users, you need to activate the feature in the app.

### Thoughtful solutions

Catlink BayMax Lite is compatible with different types of litter: bentonite, mixed and tofu. It is recommended to change it every 5-7 days if you have one cat, or every 2-5 days if you own several cats. What's more, the mat placed inside the litter box is antibacterial and resistant to leaks and pet claws. In addition, the built-in dual wheels make it easy to transport the unit. In addition, it will take up only 0.3 m<sup>3</sup>.

#### Security system

The litter box is designed so that your pet can use it safely. It has an infrared sensor, motor protection and paw-snap protection. On the other hand, 4 gravity sensors make sure you don't have to worry about the litter box tipping over.

#### Included

litter box
