Haylou GS Smartwatch

Looking for a versatile smartwatch that's great for everyday use? The Haylou GS will be a fantastic choice! The device offers a number of interesting features such as for example sleep monitoring, heart rate and blood oxygen saturation measurement, 12 sports modes and weather forecast. Its comfortable operation is enabled by a round 1.28" touchscreen display. What's more, the smartwatch weighs just 38g and has a battery life of up to 20 days.

1.28" touch screen

Enjoy a comfortable smartwatch experience. The Haylou GS features a round touchscreen that was created with 2.5D glass and provides a clear, legible image in almost any condition. You can also customize its style to your liking. Simply choose from the many dial designs available or even create your own. Express yourself and enjoy a stylish accessory on your wrist - almost nothing limits you!

Designed for your comfort

Haylou GS smartwatch is ideal for everyday use - at home, at work, on the road or during a workout. It is extremely light, weighing only 38g. Its strap is made of skin-friendly materials and is very pleasant to the touch. The device is also IP68 waterproof and dustproof. That means you don't have to take it off your wrist when you exercise, wash your hands or stay outside in the rain.

12 sport modes

Want to improve your fitness a little? Or do you want to get better and better at your favorite sport? Haylou GS smartwatch will help you! The device offers you 12 sport modes to choose from. Running, cycling or yoga? You are sure to find something for yourself! The smartwatch also counts your steps, calories burned and distances covered. Analyze your progress and enjoy effective workouts!

It will help you take care of your health

With Haylou you can get to know your body better and react quickly to possible alarming symptoms. The GS smartwatch measures your blood oxygen saturation and also allows you to measure your heart rate 24 hours a day. A sleep monitoring function is also available. You don't have to set it manually - the device intelligently detects when you sleep. Analysis of the collected information will allow you to develop good habits and finally start getting a good night's sleep!

Long working time

Don't worry about having to charge your smartwatch too often. Haylou GS is equipped with a durable battery with a capacity of 220mAh. Thanks to this it works on a single charge for up to 7 days with normal daily use or even for 20 days with basic use. So you can take it on vacation or on a business trip and not worry about it draining too quickly.

Even more features

Haylou GS smartwatch will instantly notify you of all incoming messages - so don't worry if you miss something important! It will also remind you to move if you sit in one position for too long. There are also relaxing breathing exercises as well as alarm clock, stopwatch and phone location functions. You can also check the weather and remotely control your music player.
