

Filtry ND (16/64/256) DJI Mini 4 Pro

Filtry ND (16/64/256) DJI Mini 4 Pro

Ref: 6941565969125

ND Filters (16/64/256) DJI Mini 4 Pro

The ND Filters (16/64/256) set from DJI is designed for DJI Mini 4 Pro drone users who want to deal with harsh lighting conditions and take long exposures such as timelapse. These filters are ideal for adapting to strong light, allowing for optimal shots in a variety of photo and video scenarios.

A complete set for a variety of needs

The set includes three filters: ND16, ND64 and ND256. Each meets different needs, allowing you to adjust your exposure to suit current conditions. The ND16 filter is perfect for light reduction, the ND64 is for more intense brightness reduction, and the ND256 is ideal for very long exposures and scenes with very strong lighting.

Fully compatible with your drone

Each filter in this kit weighs just 0.75g, ensuring that they won't adversely affect your drone's stability and flight dynamics. The kit is fully compatible with the DJI Mini 4 Pro drone, ensuring easy installation and a perfect fit.

Included

ND16 filter x 1

ND64 filter × 1

ND256 filter × 1
