

## DJI Ronin 4D Video Transmitter

DJI Ronin 4D Video Transmitter

DJI Ronin 4D Video Transmitter

The DJI Ronin 4D uses DJI's brand new O3 Pro video transmission technology, which provides a transmission range of over 6km previously unattainable by traditional solutions. It supports DFS frequency bandwidth and 256-bit AES encryption algorithm, which can transmit FHD 1080p/60fps video to multiple remote displays simultaneously with greatly improved security, stability and anti-interference capabilities. What's more, it excels at 2.4 GHz and 5.8 GHz. Use the DJI Ronin 4D Video Transmitter in conjunction with the DJI High-Bright remote monitor.

Ref: 6941565922267

### Included

4D Video Transmitter

Remote control

4x Ronin video transmission antenna

3mm hex key with ball end

3x hexagon screw M4-20

### Specification

Brand

DJI

Name

4D Video Transmitter

Transmission range

Over 6 km

Frequency

2.4 GHz and 5.8 GHz

Compatibility

DJI Ronin 4D

Additionally

Ultra-low latency transmission, integrated design

Price:

**€ 349.00**
