

Design & Drill Gears Workshop Learning Resources EI-4104

Design & Drill Gears Workshop Learning Resources EI-4104

Ref: 5906168432651

Learning Resources EI-4104 toy drill and screwdriver set with gears.

Learning Resources EI-4104 is an ideal set for little engineers. It supports the development of cognitive skills, independent thinking and drawing conclusions. It also enables them to work on cause-and-effect thinking. With the help of a drill, screws and gears, the child can create various constructions and practice motor skills.

Specially for the youngest children

The set is designed to develop STEM skills. It contains a total of 56 pieces and is designed for children over 3 years old. It should be kept away from toddlers due to the presence of small parts. Learning Resources EI-4104 offers opportunities for exploration and learning while developing creativity and fine motor skills!

Refined design

The set includes an activity board that makes it easy to carry and organize the pieces. In the package, you'll find a drill, a screwdriver, 9 different gears, 32 colored screws, and 10 double-sided cards with sample patterns to recreate. Importantly, the drill is powered by 2 AA batteries - however, they are not part of the set and must be purchased separately.

Included

drill/driverboardgears x9colored screws x32double-sided cards x10
