Code & Go Robot Mouse Learning Resources LER 2841

Learning Resources LER 2841 coding robot (mouse)

Give your child something that will not only be a lot of fun, but will also develop useful skills! This small mouse-shaped robot is a great way to teach the basics of coding, problem solving, critical and analytical thinking, teamwork, distance estimation and spatial imagination. By programming the device, little users can learn new things while having fun! The toy is designed for children aged 4 years and older.

Learning combined with fun

The set includes 30 coding cards and a mouse-shaped robot, which the child can program with built-in buttons. The device is able to move along predetermined paths, which creates plenty of opportunities for great fun. For example, it will be a good idea to create a maze for it from toys and other objects, and then code its movements in such a way that it goes from start to finish. The only limit is your imagination!
