Answer Buzzers (Set of 4) Learning Resources LER 3774

Sound Buttons Set of 4 Learning Resources LER 3774

The set of 4 sound buttons from Learning Resources allows the development of listening skills and participation in various games and activities. These buttons can be effectively used for quick responses in educational quizzes, as well as for physical games or language games. The distinctive sounds they produce capture attention and are loud enough to be heard in a classroom setting. Each button requires 2 AAA batteries, which need to be purchased separately. The toy is suitable for children aged 3 and older.

Sound Variety

Each button generates a different sound, captivating children's attention. The volume is sufficiently high to make the sounds audible in educational environments, facilitating learning through play.

Focus on Learning

Thanks to their simplified design, these buttons do not distract children during learning - they do not emit light and are not programmable. As a result, students can focus on the activity's objective, which is listening and reacting to the sounds.

Included in the Set:

Sound button x4

Instruction manual x1
