# Botley The Robot Coding Activity Set Learning Resources LER

Ref: 5906168432958

Botley The Robot Coding Activity Set Learning Resources LER 2935

Learning Resources LER 2935 Coding Kit (Botley Robot)
With the Learning Resources kit, young explorers can familiarize themselves with the concept of coding and programming. The Botley Robot can perform a sequence of steps, avoid obstacles, maneuver along tracks, and move objects. Equipped with a sensor on the bottom, it can follow a black line that the child can create using the cards included in the kit. The package contains up to 77 elements. The toy is suitable for children aged 5 and above.

Interactive Learning
With Learning Resources, children have the opportunity to engage in learning, technology, engineering, and mathematics simultaneously. Interaction with the Botley robot allows for learning programming and also develops logical thinking skills. Coding is done without the need for a computer or tablet screen, which is beneficial for children's health, eyesight, and concentration.

For Little Programmers
The Botley robot is equipped with a sensor that allows it to move precisely along the path designated by the child, avoiding obstacles, and maneuvering along tracks. The interchangeable arms included in the kit also allow for moving selected objects. As a result, aspiring programmers have the opportunity to understand the cause-and-effect operation of the robot and programming by visually tracking its movement trajectory.

Hidden Features for Curious Minds

Playing with the Botley robot is an endless discovery. Children can find hidden features and also make the robot greet them, say its name, make sounds, or learn new steps. With Learning Resources, boredom is not a threat to any child!

Complete Playset

The set includes up to 77 elements that promote creativity and engineering thinking through the construction of various tracks and obstacles. Available to the child will be the robot, remote programmer, interchangeable robot arms, coding cards, and various small accessories, allowing for an unforgettable adventure!

Ready for Play

Botley is ready to play right out of the box. However, it requires 3 AAA batteries, which are not included in the set. The remote programmer requires 2 AAA batteries (to be purchased separately) for power.

Included in the Set:

Botley Robot x1

Remote Programmer x1

Pair of interchangeable robot arms x1

Coding cards x40

Boards x6

Sticks x8

Cube x12

Cone x2

Flag x2

Ball x2

Goal x1

Sticker sheet x1

Instruction manual x1

Manufacturer

Learning Resources

Model

LER 2935

Intended for

Children aged 5 and above

Robot Power Supply

3 AAA batteries (not included)

Remote Programmer Power Supply

2 AAA batteries (not included)

Robot Dimensions

12.5 x 10 cm
