Design & Drill Activity Centre Learning Resources EI-4112

Ref: 5906168432729

Design & Drill Activity Centre Learning Resources EI-4112

Design & Drill Activity Centre Learning Resources EI-4112
The Learning Resources set includes 10 double-sided project cards, 120 plastic screws, a drill, a screwdriver and a universal key, allowing children from the age of 3 to engage in creative play that stimulates and develops motor skills. Please note: 3 AA batteries are required to power the drill, which must be purchased separately.

Development through Play
Activities with small elements such as screws and bolts require hand-eye coordination, enabling children using the Learning Resources set to develop their motor skills. Meanwhile, the drill with its various attachments introduces youngsters to the basics of engineering and mechanics, encouraging them to learn through hands-on activities. Another advantage is the ability to solve problems independently - children learn to make decisions by selecting the appropriate attachment for the screw and creating patterns.

A Playground for Imagination
The Learning Resources set includes a total of 10 double-sided project cards that allow children to create their own designs and follow patterns, stimulating their imagination and creative abilities. Additionally, following the patterns on the project cards teaches children to understand and follow instructions while also developing their ability to concentrate and be patient.
