

Speakers 2.0 Edifier R2750DB (black)

Speakers 2.0 Edifier R2750DB (black)

Ref: 6923520267545

R2750DB speakers

These speakers boast 136 watts of power, which is very rare for speakers of similar size. The three-way Tri-Amp amplifier allows you to indulge in sounds that are both clear and powerful. Both speakers are enclosed in wooden MDF panels to minimize any possible echo, so with them you will get a whole new music experience, rediscovering your favorite songs in even better quality.

Multi-purpose

With Edifier's R2750DB speakers, almost any device is compatible. Pair your smartphone via Bluetooth and leave the cables behind. Or connect your TV or gaming system via coaxial, optical or RCA connections.

Digital input

The coaxial connection is not as common as optical, but if your device has it, the coaxial connection tends to sound better due to its wider bandwidth, meaning it can handle higher quality audio up to 24-bit/192kHz. Optical is typically limited to 96 kHz.

Bluetooth wireless connection

Stream your music wirelessly to the R2750DB using Bluetooth v4.1 technology. Connect your laptop, tablet or phone via Bluetooth and get the party started with your playlist.

Remote controlled

The R2750DB features an ergonomic remote control that allows you to change source, volume, Bluetooth, track selection in Bluetooth mode and a handy mute button. Take control of the sound without leaving your chair.

Fine adjustment

On the side panel you'll find the treble and bass adjustment knobs you need to set your speakers exactly how you want them and, in addition, you'll find a calibrated reflect bass port on the front of the cabinet. A class-D amplifier system with digital signal processing and electronic tone control technology will give you an extra musical experience.

Additional power

Use the F5 pin bi-amplifying XLR type speaker cable with angled plugs for connection. The R2750DB speakers are equipped with an additional output for an independent subwoofer, which you can plug in at any time and turn your 2.0 set into a 2.1, thereby boosting each of the bass emitted.

Total power

136 Watts

Output power

RMS 14W x2 (tweeters) + 14W x2 (midrange speakers) + 40W x 2 (woofers) [DRC ON]
