Edifier X3 Wireless Headphones

Compact, stylish and comfortable to use, the X3 wireless headphones will provide you with excellent sound quality. With a runtime of up to 5 hours on a single charge and IPX5 water resistance, they are ideal for everyday use. Bluetooth 5.0 ensures a stable connection, and the practical touch panel makes it easy to operate the devices. In addition, a built-in noise-canceling microphone makes it convenient to talk on the phone.

Let yourself be invited to a musical feast

X3 will provide you with an unforgettable musical experience. Crystal clear, immersive stereo sound will make you feel almost like you're at a concert. Excellent balance of high and low tones, richness of details and naturalness of sound will let you experience the beauty of music anew. Your favorite songs have never sounded so good!

The reliable connection you deserve

The aptX codec is responsible for excellent sound quality and reliable connection. Stable and fast signal transmission is also ensured by Bluetooth 5.0. It also affects the X3's power consumption, which translates into their long operating time. Pairing the headphones is child's play. Just take them out of the case and they will instantly connect automatically.

Use the headphones for hours on a single charge

Worried about having to charge the X3 too often? Don't be! The built-in battery provides up to 5 hours of use, and you can extend that to up to 20 hours with the charging case. Edifier guarantees you a top-notch wireless experience. The songs you love can accompany you at home, on a workout, or even on a long trip.

Tailored to your needs and requirements

The ergonomic design and light weight of the headphones means you can use them comfortably for long hours - they fit perfectly in your ears without falling out or causing discomfort. IPX5 water resistance means that they will also work great outdoors or during workouts - drops of sweat or rain are no threat to them.

Hassle-free talking on the phone where and when you want

Hassle-free phone calls not only at home, but also, for example, at work, on the bus or at the mall? With X3 this is also possible! Stable signal and CVC 8.0 noise reduction will allow you to communicate freely with family, friends or co-workers in almost any conditions. Your interlocutors will surely hear you clearly.

The most important functions always at your fingertips

Each handset is equipped with a touch panel. It allows intuitive and convenient operation of the X3. With a few gentle presses, for example, you can handle phone calls, switch songs, stop and resume playback, and activate Google's intelligent assistant or Siri. You no longer have to reach for your phone every time!
