Speakers 2.0 Edifier Airpulse A300 Pro (brown)

Ref: 6970582640960

Edifier A300 Pro active speakers

Edifier A300 Pro speakers will meet the expectations of even the most demanding music lovers. They provide excellent sound quality with ultra-low distortion thanks to the XMOS multi-core signal processor. They are equipped with several ports that allow you to connect various devices, and they also support Bluetooth 5.0 wireless transmission. The wooden casing makes them look extremely elegant, and the included remote control allows you to conveniently operate them remotely.

Superior sound quality

Ensure an unforgettable musical experience. The A300 Pro are equipped with a ribbon horn tweeter and a tapered 6.5" aluminum subwoofer with an overhead design. It also has a multi-core XMOS xCore2000 signal processor and a high-end digital amplifier to minimize distortion. All this allows you to enjoy crystal clear, richly detailed sound of the highest quality.

Multiple connection possibilities

You decide how you want to play your favorite playlists. The speakers are equipped with several ports such as AUX, USB, optical, coaxial and Balance, making them compatible with various audio sources. The A300 Pro's digital inputs support sampling rates up to 192 KHz. You can also connect to the speakers wirelessly. Bluetooth 5.0 connectivity with apt-X HD codec ensures fast, stable and seamless transmission.

Remote control included

You no longer have to move every time to, for example, start the speakers or change the selected settings. The kit includes a functional remote control that allows you to conveniently operate the A300 Pro from a distance. With it, you can not only turn them on or off, but also, for example, mute, pause and resume playback, switch a song, select a sound source, adjust the volume and even adjust treble and bass.

Enhanced design

The speakers impress not only with their fantastic sound quality, but also with their classic, stylish design. The 25mm thick MDF wood cabinet finished in walnut veneer gives them an elegant, timeless character and makes them an excellent addition to the decor of almost any interior. It also performs another important function - it minimizes unwanted vibrations for even better sound quality. The A300 Pro are also equipped with a cable from Transparent.
