Edifier GS02 USB External Sound Card

Give yourself an even more interesting experience when playing games or listening to music. The Edifier GS02 USB External Sound Card with CM108B chip offers 7.1 surround sound effect, perfect for karaoke or live broadcast. Change the sound of your voice with the Magic Voice function and enjoy lossless signal transmission. The Edifier sound card also stands out for its wide compatibility.

Superior sound quality

Enjoy high-fidelity audio and dreamlike immersion levels. The GS02 sound card comes with customizable driver software that can provide 7.1 surround sound effects. What's more, the built-in CM108B chip guarantees sampling rates as high as 16-bit/ 44.1kHz and 48kHz. Clear sound and rich details will let you immerse yourself in the game even more!

Change your voice

Want to spice up your live broadcast? Or maybe you want to surprise your friends at your next online game? The Edifier GS02 sound card will help you do just that! Just use the Magic Voice function, which lets you change your voice. For example, you can sound like a cartoon character or a monster. Try it out and have fun!

Reliable performance

Don't worry about connection problems. The Edifier sound card comes with a 1.2-meter cable for lossless audio transmission and high resistance to interference. There is also a Monitor mode that offers real-time voice feedback. It will be perfect for example during karaoke or when you are conducting a live broadcast.

User-friendly

Operating the GS02 external sound card will not cause you any problems. Thanks to its plug&play system, you can simply connect it to your computer - no need to waste time on complicated configuration. It is compatible with Windows, Mac OS and Linux operating systems, among others. The metalized surface and RGB backlighting give it a unique character.
