Edifier HECATE G5BT Gaming Headphones

Immerse yourself in the gameplay and create a unique atmosphere in your gaming zone. Edifier G5BT gaming headphones offer high quality audio and H+ sound effect to give you the immersion level you dream of. A retractable microphone allows you to conveniently communicate with your fellow gamers, and a long-lasting battery provides up to 36 hours of battery life. You can connect the headphones via wired or Bluetooth connection. Additional decoration of the devices are magnetic cat ears and RGB backlighting.

Incredibly stylish

The G5BT headphones are the perfect combination of functionality and style. It comes with nice-to-touch silicone cat ears, which can be easily mounted or dismantled thanks to built-in magnets. Noteworthy is also the dynamic RGB backlight, which you can adjust to your liking, choosing from 8 available modes. Solid light, pulsating, or maybe a multi-color gradient? What's more, the backlight will turn on automatically when you attach the cat ears to the headphones.

2 connection possibilities

You can connect your headphones in 2 ways. If you don't want to worry about battery level and want high resolution sound, use the included 3.5mm audio cable. Want almost unlimited freedom and go wireless? Connect with the device of your choice using reliable Bluetooth 5.2, which ensures fast, stable transmission and ultra-low latency.

Built for gameplay

Enjoy dynamic gaming and show your rivals who's boss. Bluetooth 5.2 with the PixArt gaming chip lets you enjoy an incredibly low latency of about 45ms. The perfect synchronization of video and audio will make sure you won't be caught off guard! There is also a special H+ effect, which is responsible for accentuating the sound of footsteps and gunshots, among other things. This makes it easy for you to locate the enemy and aim a bullet at him.

High-quality sound

The Edifier G5BT headphones are ideal not only for gaming, but also for listening to music. They can provide fantastic quality sound in high resolution 24bit/96kHz, which is confirmed by the Hi-Res Audio certification. They are also equipped with 40mm drivers with composite diaphragms. Crystal clear sound and richness of details will make you feel almost like at a concert in your own room!

Dreamlike comfort

Play for as long as you want without worrying about discomfort. The soft ear pads of the headphones are made of pleasant to the touch, breathable materials. They don't put uncomfortable pressure on your ears and provide unsurpassed comfort, even during prolonged gaming. The adjustable headband allows you to further customize the G5BT to your needs, and the foldable design makes them easy to transport and store. The headphones also have several buttons for easy operation.

Surprisingly long operating time

What else makes the G5BT so good for prolonged gaming? Long runtime! Thanks to a durable 800mAh battery, fully charged headphones can last you up to 20 hours with the RGB backlight on, and up to 36 hours with it off. Prolonged gameplay or a long trip? You do not have to worry that a battery discharged too quickly will prevent you from listening to your favorite tracks!

ENC noise-cancelling microphone

Forget about communication problems during gameplay. The G5BT headphones feature a dual microphone that perfectly registers your voice. They also support ENC noise-canceling technology that effectively filters out up to 90% of background noise. So you can be sure that your fellow gamers will be able to hear you. The microphone also features a retractable design. When you don't need it, simply slide it back into place so it doesn't get in the way.
