Car speaker, Edifier S651A

Ref: 6923520231249

Car speaker, Edifier S651A

If you're looking for an in-car speaker that delivers unmatched sound quality and durability, no matter the conditions, the Edifier S651A is the perfect choice. The tweeter features a 12mm diaphragm made of silk. This innovative design guarantees extremely clear and precise sound, allowing you to fully experience all the nuances of music. The woofer is made of injection-molded PP plastic, making it lightweight and resistant to car conditions. It faithfully reproduces low-frequency sounds, so you can enjoy full bass and low frequencies, regardless of your preferred music. The speaker offers 50W of power, which means it will give you a solid musical experience.

High quality and directional sound

What else makes the Edifier S651A so good? The speaker responsible for the treble is positioned at a specific angle, providing an optimal experience for the listener sitting in the car. This ensures that the sound is directed where you need it most. The speaker stands out for its wide compatibility and is sure to integrate with your car's audio system.
