Car speakers, Edifier G402A

Looking around for a car speaker that delivers unmatched mid and treble performance and durability, no matter the conditions? The Edifier G402A is for you! The tweeter is equipped with a 19mm dome diaphragm, which is responsible for clear and precise sound, while the PP woofer faithfully reproduces low-frequency sounds. It is lightweight and resistant even to harsh conditions. With Edifier, you can enjoy faithful reproduction of bass and low frequencies from the lowest range, regardless of your preferred music. The speaker offers 25W of power for optimal performance in normal car conditions.

High quality and directional sound

What else makes the Edifier G402A so good? The speaker responsible for the treble is positioned at a specific angle, providing an optimal experience for the listener sitting in the car. This ensures that the sound is directed where you need it most. The speaker stands out for its wide compatibility and is sure to integrate with your car's audio system.
