

## Car amplifier, Edifier DA580

Car amplifier, Edifier DA580

Ref: 6923520232017

Car amplifier with DSP, Edifier DA580

The Edifier DA580, a Class-D car amplifier, is designed for music enthusiasts who demand the highest sound quality. Its optimization for maximum power and depth of sound will definitely raise the level of your audio experience while traveling in the car. It features a wide frequency response and power that set it apart from the competition. Plus, with an impedance of 4Ω, it is able to work perfectly with most car speakers on the market. Hit the road and experience sound quality like you've never known before!

Higher level of power

The Edifier DA580 amplifier is a real powerhouse in the audio world. It delivers full dynamic and clear sound regardless of the volume setting. With a huge RMS output power - 4x90W at 4 Ohms or 4x110W at 2 Ohms, it provides an amazing listening experience without distortion and noise.

Fullness of sonic detail

The DA580 provides a listening experience of the highest level. Its wide frequency response guarantees clear, glassy highs and intense, deeply resonant bass. No matter what your musical taste - gentle jazz, energetic rock or rhythmic hip-hop, Edifier will give you the full spectrum of sound in every song.

### Versatile and compatible

The Edifier DA580 will integrate perfectly into the audio systems of many vehicles. With an impedance of 4Ω, it works seamlessly with most car speakers on the market. The amplifier operates at 9-16V, providing a wide range of compatibility and flexibility with various devices. Its compact design makes it easy to install in your car without any modifications to its interior. What's more, you can connect it to a power source via Bluetooth.

### Wide possibilities

The Edifier DA580 processor offers advanced functionality, ideal for the most demanding car audio systems. With 4 LO and 4 HI input channels, 2 AUX inputs (RCA) and 6 line-level RCA outputs, it stands out for its versatility. Each channel is equipped with a 31-band graphic equalizer with adjustable Q, time delay, and high-pass, low-pass and bandpass filters. These extensive features make it an indispensable part of any professional audio system.

Manufacturer

Edifier

Model

30Hz-18kHz

Total power

RMS 4x90W (4Ω); 4x110W (2Ω);

Frequency response

30Hz - 18kHz

Impedance

4 Ω

Input sensitivity

0.3V - 6V

Bluetooth module

4.1

Power supply voltage

9V-16V

Weight

1.27 kg

Price:

**€ 155.00**

Audio, Bluetooth speakers
