Car speaker set, Edifier GF651C

Do you want great sound quality while driving your car? The Edifier GF651C two-way speaker set will allow you to create the perfect audio environment. It includes a tweeter with a 25mm diaphragm made of silk and an extremely durable woofer made of PP plastic. The use of 4 crossovers contributes to their optimal performance, providing even better sound characteristics, separation and spatiality. With a peak power of 120 watts and a frequency response of 55 Hz - 25 KHz, it will give you the best experience! Embark on a musical journey with Edifier!

Better treble sound

The silk-diaphragm tweeter provides clean, clear and harmonic sound, especially in the treble range, resulting in a perceptible increase in sound quality. In addition, coil cooling with Ferrofluid magnetic fluid benefits from better high-frequency reproduction, reduced resonances, effective coil cooling and improved sound dynamics. Listen to your favorite tunes without distortion or interference!

Feel the depth of the bass

The Edifier GF651C features a lightweight woofer made of durable PP plastic, making it resistant to harsh automotive conditions. As a result, you can enjoy deep and powerful bass that will add dynamics and enhance the energy of your favorite music. What's more, by using a woofer coil wound on a KAPTON-type carcass with lightweight CCAW copper-coated aluminum wire, the Edifier GF651C kit

provides even more precision and sensitivity to the speaker, resulting in excellent low-frequency reproduction and better sound separation. This bass will move you!

Included

2 "tweeter" tweeters

2 "woofer" woofers

4 Crossovers
