

Wireless Gaming Mouse Edifier HECATE G3M PRO 26000DPI (Black)

Wireless Gaming Mouse Edifier HECATE G3M PRO 26000DPI (Black)

Ref: 6923520246946

Edifier HECATE G3M PRO 26000DPI Wireless Gaming Mouse (black).

Edifier G3M PRO mouse is an indispensable tool for any true gaming enthusiast! The advanced PAW3395 sensor, created in cooperation with PixArt, is responsible for the mouse's efficient and reliable performance, and thanks to the ability to adjust the DPI up to 26,000, you will easily adjust its operation to the type of game. It offers 3 different ways to connect to the device and 2 different switches. The long wireless runtime of up to 70 hours guarantees uninterrupted hours of thrilling gameplay without the need for frequent recharging, and the lifespan of 90 million clicks will ensure reliability for years to come.

Precision in your hands

The advanced PAW3395 sensor, combined with adjustable DPI from 50-26000, allows you to perfectly adjust the mouse's sensitivity to your playing style. You decide how precisely you want to control every aspect of your gameplay! With an IPS rating of 650 and 50G acceleration, even the most dynamic movements will be extremely precise and smooth.

2 different switches

By using two different Huano mechanical microswitches, you can customize the sound of the clicks to suit your current mode. Gaming mode makes the mouse respond precisely to your every command, with a switch life of 80 million clicks. On the other hand, the silent mode is perfect not only for work, but also for night gaming - the life of the switches reaches 10 million clicks.

3 ways to connect

Now you can connect your mouse to the device of your choice the way you like. Edifier HEACATE G3M PRO supports both wireless and wired connection. Use the included USB-C cable to freely play your favorite games without worrying about your mouse suddenly discharging. Do you value freedom of movement? No problem! Take advantage of the Bluetooth connection or the 2.4GHz link, which guarantees ultra-low latency of just 1ms.

With comfort in mind

The ergonomic and ultra-lightweight design (63g) of the mouse guarantees unparalleled comfort even during hours of gaming. Edifier HECATE G3M PRO fits perfectly to the shape of your hand, allowing it to remain in its natural position - so you don't have to worry about persistent wrist pain! Skin-friendly materials have been used for the mouse to prevent sweaty palms, and thanks to the use of Teflon glides on the bottom, the mouse moves smoothly on the surface of the desk.

Customize it to your preferences

Want to personalize the mouse's performance even more? Take advantage of the HECATE Connect software! With it, you can, among other things, change the functions of selected buttons, adjust the DPI, set your own macros and much more.
