### Edifier X5 Lite TWS Earbuds (Black)

Edifier X5 Lite earbuds come equipped with dual microphones featuring intelligent ambient noise reduction, which muffles external noise and isolates your voice during calls. The earbuds' batteries allow for 6.5 hours of music playback, extendable by 19.5 hours thanks to the charging case! Battery running low? Charge the earbuds for 10 minutes and gain an additional hour of listening. Bluetooth 5.3 technology ensures a stable connection without interference, useful especially during gaming. It's worth activating the gaming mode, which reduces latency to 65ms, allowing for easy wins! Edifier X5 Lite is not only for gamers - sports enthusiasts and outdoor lovers will appreciate them for their IP55 protection, ensuring dustproofing and protection against moisture (excluding heavy rain). With built-in touch panels, you don't even have to reach for your phone - you can control playback, calls, microphone, and modes directly from the earbuds! The Edifier app provides access to additional features.

### Call Quality with Dual Microphones and Noise Reduction

One of the most attractive features of the Edifier X5 Lite earbuds is the implementation of dual microphones with intelligent noise reduction. This means that during calls, your voice is clear, and ambient noises are effectively eliminated. This is very useful in urban noise or on a windy walk — you don't have to raise your voice or repeat yourself.

### Battery Life and Quick Charging

When talking about wireless earbuds, the operating time on a single charge is crucial. Edifier X5 Lite offers 6.5 hours of music playback, and when you add the time provided by the charging case, you get an impressive 26 hours! And if you forgot to charge the earbuds and suddenly need to use them? No problem — 10 minutes on the charger gives an additional hour of playback.

#### Connection Stability with Bluetooth 5.3

The Bluetooth 5.3 technology in these earbuds guarantees a stable and swift connection with the device. This is important not only for listening to music but also during gaming. No one likes interrupted sound or delays that can affect gameplay.

#### Gaming Mode and Low Latency

For gaming enthusiasts, the gaming mode option will be important. This feature reduces latency to 65 ms, which in practice means that the sound is synchronized with the image on the screen. This can be decisive in situations when every fraction of a second counts.

#### Weather Resistance and Touch Panels

The earbuds are also suitable for physically active people. IP55 protection ensures dustproofing and resistance to moisture, which is essential for runners or those working out at the gym. Touch panels are an additional convenience, so you don't have to take out your phone to change a track or answer a call.

#### Package Contents
