Phone active cooling Edifier HECATE C4

Ref: 6923520285716

Active cooling for your phone Edifier HECATE C4

Do you often play games on your smartphone? Take care of its effective cooling. The Edifier C4 uses a fan that operates at a high frequency to effectively prevent your device from overheating. What's more, it automatically shuts down to protect your hardware from damage and offers colorful backlighting. In addition, the cooling is distinguished by its lightweight and compact design, so it won't get in the way while using your phone.

Effective protection for your phone

The Edifier C4 has a large cooling area (40 × 40 mm), which enhances the product's performance. What's more, the cooling has a fan that consists of 7 blades operating at a frequency of 5500 rpm. In addition, the use of aluminum and silica gel further improves the heat dissipation process. This ensures that your smartphone is protected from overheating.

Thoughtful design

The cooler weighs less than 87 g, so it won't take up much space. You also don't have to worry about annoying noise - the device offers 3 modes with noise levels of 31 dB (Silent), 35 dB (Medium) and 37 dB (Very Cold). What's more, the NTC sensor allows the C4 to shut

down automatically to avoid damaging the product. On the other hand, the PCBA protects the circuit board from condensation damage and extends the life of the product.

Wide compatibility

Edifier C4 active cooling will work well with iPhone 12 (or newer) - thanks to its magnetic design, you can directly attach it to the device. The product also supports Android smartphones and tablets - use the magnetic sticker (included) for this purpose. What's more, the cooler can also act as a phone holder - lean it against a flat surface and comfortably watch movies, series and make video calls.
