

Speakers 2.0 Edifier R1280T with Smart Wi-Fi Audio Streamer

Ref: 6923520286232

Speakers 2.0 Edifier R1280T with Smart Wi-Fi Audio Streamer WiiM Mini (brown)

Edifier R1280T 2.0 Speakers with Smart Wi-Fi Audio Streamer WiiM Mini (brown)

The R1280T speakers are a subtle combination of retro appeal with a modern sense of sound quality. Featuring a 4-inch woofer and calibrated bass reflex port, it delivers solid, rich bass notes that fill the room with a sense of tremendous depth. The R1280T's faithful sound production and performance is every audiophile's dream. Eagerly connected to turntables by users as they can achieve the best sound experience. Enjoy your classic vinyl records while taking advantage of advances in modern audio technology. You'll also find a compact smart Wi-Fi audio streamer WiiM Mini that supports various streaming platforms, including Spotify and Amazon Music.

Precise control

Personalize the operation of the Edifier R1280T. The speaker is equipped with knobs that you can use to adjust bass, treble and volume. Depending on your preference, you can micro-adjust the treble and bass from -6 to +6 db. This allows everyone to enjoy the perfect sound. What's more, a remote control is included - you don't have to get up from the couch to adjust the volume or mute the sound.

Dual RCA input

The R1280T can be connected to multiple audio devices via dual RCA inputs. By looking at the rear panel, you can easily identify which is a passive speaker and which is an active speaker. The active speaker has two inputs located on the rear panel. These inputs are ideal for RCA to RCA or RCA to AUX connections. Connect them to your computer, laptop, tablet, phone or record player. The speakers are

connected together using an ordinary speaker cable.

Compatibility with various platforms

In addition to the speakers, you'll also find a smart Wi-Fi audio streamer WiiM Mini audio streamer in the package. It allows you to stream audio from platforms such as Spotify or Tidal. In addition, it supports Amazon Music, TuneIn, Deezer, Qobuz, iHeartRadio, Pandora, SoundMachine, vTuner, Calm Radio, Radio Paradise and SoundCloud. What's more, the player is compatible with Apple Air Play 2, so you can stream music from Apple devices. In addition, Amazon Alexa and Siri support allows you to control the music player with voice commands.

Create multi-room audio

Another advantage of the smart Wi-Fi audio streamer WiiM Mini is the ability to create a multi-room audio system. It allows you to play music simultaneously from multiple Apple devices placed in several different rooms. All you have to do is connect these devices to Amazon Alexa, AirPlay 2 or WiiM Home.

High-quality sound and convenient connection

The smart Wi-Fi audio streamer WiiM Mini supports high-quality audio with 24bit/192kHz, allowing you to enjoy Hi-Res audio. What's more, it supports Bluetooth 5.2 and the 2.4GHz and 5GHz bands, ensuring stable and fast signal transmission. It also supports AUX and optical wired connection.
