

360° Outdoor Wi-Fi Camera IMOU Cruiser Dual 8MP

360° Outdoor Wi-Fi Camera IMOU Cruiser Dual 8MP

Ref: 6971927239573

IMOU Cruiser Dual 8MP outdoor Wi-Fi camera.

Have confidence that your home is safe and secure. The IMOU Cruiser Dual camera is equipped with 2 lenses - 3MP and 5MP. This allows it to monitor 2 areas at the same time, while providing excellent image quality - even at night. It also features a swivel design and IP66 water resistance. It also has a built-in microphone, speaker and alarm siren. In addition, it accurately detects people and cars. There is also a dedicated app that makes it easy to use the device.

2 lenses, versatile protection

The camera has as many as 2 lenses, which means you can use it to monitor 2 areas at the same time. The Cruiser Dual model also provides excellent image quality - the resolutions offered are 3MP and 5MP. As a result, the recorded image is clear and saturated with detail! You also get several night vision modes (Smart, Full-color, Infrared and Off). What's more, the camera's lower lens rotates 355° horizontally and 90° vertically, and the upper lens rotates 260° and 30° respectively. All this ensures that your home has comprehensive protection from all sides!

Precise motion detection

Be sure that there is no unwanted presence in your home. The Cruiser Dual camera uses the manufacturer's proprietary IMOU SENSE algorithm to accurately detect people (from up to 22 m away) and vehicles (from up to 44 m away). Thanks to the high accuracy of this

solution, you don't have to worry about false alarms caused, for example, by flying insects or trees swaying in the wind. Also noteworthy is the Smart Tracking function, which allows you to automatically track moving objects. It is also worth noting that each camera lens supports its own algorithm, which translates into even greater precision.

Improved design

You can mount the camera outdoors without any worries - the Cruiser Dual will perform well even in harsh weather conditions. The device features IP66 water and dust resistance, so it won't be intimidated by rain or wind. In addition, the Wi-Fi 6 connectivity standard provides faster data transmission and greater range.

Speaker, microphone, alarm

Staying out of the house? Use the Cruiser Dual to conveniently deliver a message to your child, greet guests or ask the courier to leave a package at your neighbor's house! The device is equipped with a speaker and a microphone with echo cancellation function, which ensures high quality sound. There is also an alarm siren with a volume level of up to 110 dB - the camera can set it off when it detects the presence of an intruder.

Additional features in the app

Get the most out of your camera. All you need to do is connect it to a dedicated app - using it, for example, you can designate a detection zone and create an operating schedule. Alarm settings are also available. Customize the operation of the device to your needs and raise the level of security in your home!
