Speakers 2.0 Edifier R1580MB (black)

Ref: 6923520265671

Exceptional Edifier R1580MB speakers

This modern set of Edifier speakers is a high quality musical experience enclosed in an elegant casing that will fit into any interior. Speakers can be operated in a standard way or with the included remote control. Dual RCA input allows connection with many Stereo/Audio devices, you can also play music from your phone via Bluetooth. The R1580MB allows you to customize the sounds to suit your musical needs. Discover your favorite sounds anew.

High quality construction

Speakers are made of thick, market-proven MDF, the front is covered by a grille that encloses the two drivers and a round bass reflex port with a diameter of about 35mm. The tweeter has a 13mm silk dome, covered by a pitch made of plastic. The 4-inch diameter mid-bass driver is placed below it on a rubber suspension. Feel like you're at a concert, in your own home.

Many possibilities

The Edifier R1580MB speakers are equipped with two 6.3mm jacks, allowing you to connect microphones to them, perfect for any karaoke enthusiast's home. The sound from them is amplified and played instantly through the speakers. There is nothing left but to invite your friends and enjoy the time spent together. Hidden potentiometers allow you to adjust the volume, switch between sound sources, and adjust the volume balance between music and microphone sound.

Handy controls

You can operate the speakers with the small, battery-powered remote control included in the box. It works with the infrared port, which is located in the front wall of the active speaker. You can use it to turn the speakers on and off, adjust volume and control music played via bluetooth.

Elegant housing

Classic, black color of speakers makes them perfect for any interior for many years. Thick MDF board housing with a thickness of about 5mm protects the speakers from damage and minimizes acoustic resonance, providing clear sound without distortion.
