

Smart Water Sensor HomeKit NEO NAS-WS02BH ZigBee

Ref: 6924715900520

Smart Water Sensor HomeKit NEO NAS-WS02BH ZigBee

Smart Water Sensor HomeKit NEO NAS-WS02BH ZigBee

Use modern technology to keep your home safe. The NEO NAS-WS02BH flood sensor will automatically inform you of a possible water leak and you will receive a notification on your phone. This allows you to react in time to avoid damage to the floor, appliances or furniture in the room! The product is compatible with Apple HomeKit and TUYA / Smart Life. It supports the ZigBee 3.0 protocol - a ZigBee gateway (sold separately) is required for operation.

Real-time notifications

Keep your finger on the pulse and gain the ability to react quickly in the event of possible flooding in your flat. The NEO sensor is equipped with a sensitive probe. As soon as it detects a water leak, you will receive an instant notification on your phone! You can also check the status of the device in the app at any time. Keep everything under control and don't worry that your walls, floors or equipment in the room will be damaged due to flooding!

Many applications

The NEO sensor will prove itself wherever there is a risk of water leakage. For example, you can use it in the bathroom - install it near the bathtub, shower cubicle, washbasin or washing machine. You can also use it in the kitchen. Fix it next to the fridge or sink to be informed immediately of any malfunctions! The product is very easy to install and set up - you won't have any problems.

Combine it with other appliances

The possibilities don't end there. You can also connect the sensor to other devices and then automate their operation. Pair it with an alarm siren, for example, and make it sound when a leak is detected. This way, the household will know immediately of a possible emergency and someone will have time to react accordingly! Note: a ZigBee gateway is required to pair the devices together.

Compatibility with Apple HomeKit

Do you use Apple HomeKit on a daily basis? We have good news for you - the NEO NAS-WS02BH flood sensor is compatible with this platform, so you can add it to your smart home ecosystem. Manage all your smart devices from a single app - no more switching between windows!
