

## Smart Plug HomeKit NEO NAS-WR10BH ZigBee 16A

Smart Plug HomeKit NEO NAS-WR10BH ZigBee 16A

Ref: 6924715900506

Smart Plug HomeKit NEO NAS-WR10BH ZigBee 16A

Gain the ability to remotely control your devices, schedule their operation and monitor energy consumption. The NEO NAS-WR10BH Smart plug allows you to control connected equipment using the TUYA / Smart Life app or Apple HomeKit, or you can operate it using voice commands. The product is very easy to use and is equipped with LED backlighting. It supports the ZigBee 3.0 communication protocol - to use it, you will need to purchase a ZigBee gateway (sold separately).

### More convenient device operation

Do you sometimes forget to switch off some devices? With NEO, you don't have to worry about that anymore! The socket allows you to control your connected devices via an app. So you can switch a lamp, the TV or the sandwich toaster on or off at any time with just a few clicks on your phone! It is also a good idea to share your appliances with the rest of the household so that they too can control them remotely.

### Voice control

Are you cooking and need to get the microwave running quickly? Or are you sitting on the sofa and want to switch on the TV to watch your favourite series? No problem - the socket is compatible with the Google Assistant and Amazon Alexa voice assistants. This gives you the ability to control it with simple commands! With just a few words, you can, for example, turn off the lights or start the coffee

machine.

#### Reduce your electricity bill

Feeling like your electricity bills are a little too high? The NEO socket will help you reduce them! The product allows you to monitor your energy consumption in real time - just take a look at the app. Find out which devices consume the most electricity and think about how you can reduce this. Eliminate bad habits, start saving and pay lower bills!

#### Plenty of additional possibilities

The socket is compatible with the TUYA / Smart Life app, which allows you not only to control it remotely, but also to use the timer function, for example. You can also add it to the Apple HomeKit platform or SmartThings. Have all your devices in one place and manage them conveniently - without having to switch between different windows.

#### Create smart scenes

Customise the operation of devices in your home to suit your lifestyle. Simply connect your socket to other smart appliances and sensors (ZigBee or Wi-Fi) and automate their operation! This way, for example, you can make the coffee machine start up when you get out of bed and the hallway light turn on when you get home from work.

#### Even more convenience

The socket is very easy to use and can easily handle most common appliances such as lamps, TVs, fans, washing machines, fridges and even microwaves. It is also able to save the last settings and automatically restore them if there is a power failure. It also offers a special safety lock so you can use it in a place with children without worry.

#### Brand

NEO

#### Model

NAS-WR10BH

#### Colour

White

#### Input voltage

AC 85-240 V 50/60 Hz

#### Max. current

16 A

#### Standby power consumption

0,5 W

#### Operating temperature

0°C to 40°C

#### Operating humidity

20% to 85%

#### Frequency

2.4 GHz

#### Wireless communication protocol

ZigBee 3.0, IEEE 802.15.4
