

Human presence sensor Pro NEO NAS-PS09B Zigbee

Human presence sensor Pro NEO NAS-PS09B Zigbee

Ref: 6924715900858

NEO NAS-PS09B ZigBee smart presence and motion sensor

Increase the level of comfort and security in your home or office. The NEO NAS-PS09B smart presence and motion sensor will allow you to conveniently check if someone is within its range, and it can also send notifications in the app. It is also possible to connect it with other devices and automate their operation. The product is powered by USB-C, and is also distinguished by its simple installation and configuration. In addition, it works with the Zigbee standard and the Tuya ecosystem. Note: the sensor requires a Zigbee gateway, which is not included in the kit, for proper operation.

Reliable detection

The sensor is equipped with millimeter-wave radar, so it accurately detects presence and motion. Its range is a maximum of 6 meters, and its detection angle is as high as 120°. For even greater accuracy, the device can rotate - by 15° horizontally and by 50° vertically.

Remote control

Convenient operation of the sensor is enabled by a dedicated app. Using it, you can check if someone is near it, turn on notifications, set the detection range, view the event history and much more. You also have the option to share the device with the rest of the household so that they too can enjoy its remote control.

Create smart scenes

Connect the sensor with other devices and create smart scenes to make your home or work even more comfortable. For example, you can make it so that when someone enters a conference room, the lights will automatically turn on and the air conditioning will turn on. It would also be a good idea to set the air conditioning to run whenever someone is in the bedroom. The possibilities are almost endless!
