Flashlight Nitecore MH27UV, 1000lm, USB

NITECORE MH27UV flashlight

The NITECORE MH27UV is a tactical torch that focuses on functionality and compatibility with other tactical equipment. It is chosen by professionals in the field of forensics, gemology or uniformed services.

Impressive performance

The MH27UV uses a CREE XP-L HI V3 LED. The combination of PDOT (Precision Digital Optics Technology) and the crystal coating of the LED means that the torch can achieve a beam range of up to 462 metres. The efficiency of the solutions allows the device to achieve a brightness of up to 1000 lumens. In addition, the ATR (Advanced Temperature Regulation) technology monitors the temperature of the device and adjusts its operation to ambient conditions.

3 additional sources

In addition to the main LED, the torch has 3 more. The low intensity red light works well for tactical approaches. The blue beam is used for searching and confirming blood traces, and the UV light is perfect for gemology and forensics.

Efficient power supply

The recommended power supply for the MH27UV is an 18650 battery, which has a higher capacity than AA batteries and works for up to 708 hours on a single charge. You can conveniently recharge the battery via USB. The USB port is protected by a rubber cap, to protect it from water and dust. What's more, you can always keep track of charging status - just take a look at the flashing marker.

Easy-to-use interface

The device has 3 buttons that control all of its functions. The tactical switch located at the torch shaft allows you to illuminate the area by holding down or pressing continuously. The 2 buttons located at the head allow you to freely change the mode and brightness level. The torch has several additional modes such as strobe, SOS and red/blue warning signal.

Compatibility

The MH27UV is a tactical piece of equipment, designed for situations requiring specialised equipment. The torch is compatible with most such accessories, such as filter caps, weapon mounts and remote belt switches. What's more, the device is equipped with a special metal ring, ensuring stability and further increasing precision in situations that require it. All of this, combined with an IPX8 water resistance rating, ensures the reliability of the equipment in virtually all conditions.

Kit includes

MH27UV Flashlight
USB cable
Holster
Clip
Tactical metal ring
Lanyard
Additional USB port cover
Spare O-ring
Spare tailcap cover

Specification

Producer
NITECORE
Model
MH27UV
Brightness
up to 1000 lumens
Dimensions
154 x 40 x 40 mm
Weight
170 g
Colour
Black
Waterproof
IPX8
