

Headlamp Nitecore HC65 V2, 1750lm, USB-C

Ref: 6952506407002

Headlamp Nitecore HC65 V2, 1750lm, USB-C

NITECORE Headlamp HC65 V2

The NITECORE HC65 V2 is a head torch that you can take with you virtually anywhere. 3 separate light sources and multiple modes provide versatility, while the powerful rechargeable battery allows you to use the device for hundreds of hours on a single charge. Additionally, it continuously adapts to environmental conditions thanks to the ATR system.

3 light sources

The torch has 3 separate LEDs to allow the user to tailor the operation of the device to their needs. The main LED of the Luminus SST-40-W provides a brightness of up to 1750 lumens with a range of up to 165 metres. The red auxiliary light is ideal for nature or sky observation and will provide a good complement to a night-time photo shoot. The white auxiliary light, on the other hand, is designed for short-range use, such as when reading. The high colour rendering index (CRI \geq 90) ensures natural lighting without tiring the eyes.

Stable power supply

The HC65 V2 is equipped with a 3500mAh lithium-ion battery. This gives you up to 800 hours of battery life on a single charge, and you can extend that to 33 days using only ULTRALOW mode. You can conveniently charge the battery with a USB-C connection - it only takes 185 minutes. Additionally, the torch is compatible with the NL1835LTHP battery - which can withstand temperatures as low as -40°C.

User-friendly interface

The operation of all functions of the device is available under one button. By pressing it, you can set 1 of 5 brightness levels, change light sources or select 1 of the special modes (strobe, locator, red flash).

Lightweight, durable construction

The HC65 V2 is made from a lightweight and durable aluminium alloy used in the aerospace industry. In addition, the device is IP68 waterproof, which protects it from water and dust. The torch can be immerse in water up to a depth of 2 meters and is resistant to damage caused by drops from a height of 2 meters.

High level of comfort

The torch is set in a special rail that allows 180-degree horizontal adjustment. What's more, the light beam falls at an angle of 100°. The combination of these two solutions ensures that you can adapt the operation of the equipment to your own requirements and avoid half measures. The headband, made from breathable material, is equipped with a silicon strap that prevents sweat from running into your eyes. What's more, a rubber pad provides comfort and increases the fit of the headband at the back of your head. All this, together with the non-slip front grip, makes using the device a simple and enjoyable experience.

The kit includes

- HC65 V2 head torch
- 18650 3500 mAh rechargeable battery
- USB-C cable
- Headband
- Rubber bracket
- Spare O-ring

Specification

Producer

NITECORE

Model

HC65 V2

Brightness

up to 1750 lumens

Dimensions
