

Flashlight Nitecore TUP, 1000lm, USB

Flashlight Nitecore TUP, 1000lm, USB

Nitecore TUP Flashlight

The flashlight is equipped with an LED that delivers eye-friendly light with up to 1000 lumens of brightness, and a light range of up to 180m. The OLED display will provide you with the most important information about the TUP's operation, and thanks to the built-in 1200 mAh battery, it can work up to 70 hours on a single charge. Its lightweight and compact design makes it easy to store, and you can also attach your keys to it with the included clasp. Made of high-grade aluminum, it is durable and resistant to water at IP54 level and drops up to 1m. You can also adjust its brightness and set modes.

OLED display and lock function

The TUP features an OLED display that you can use to check the battery level, voltage, brightness set, current mode, or remaining runtime. In addition, the flashlight is equipped with 2 lock functions. The first locks the power button, but you can still use the TURBO mode. While the second locks both buttons, so you can safely store it in your backpack without worrying about accidentally turning it on.

2 operation modes and brightness adjustment

You can customize TUP's operation with the available modes: DAILY and DEMO. DAILY mode will be useful when using the flashlight for a long time, while the second mode will be used to temporarily illuminate a selected area. You can also adjust the brightness from 1 to

1000 lumens. What's more, the flashlight has a mode memory function. This means that if you turn on the TUP, it will work on the mode you last used.

Long runtime

The flashlight has a 1200 mAh lithium-ion battery that allows you to work up to 70 hours on a single charge. In addition, APC technology extends the flashlight's standby time.

Safe charging

The flashlight is equipped with several safety features, making it safe to charge. TUP is protected against over-discharge, over-charging and short circuit. In addition, charging will stop automatically when the battery level reaches 100%. And the ATR technology adapts to the prevailing environmental conditions to ensure efficient operation. You can charge the flashlight with a micro USB port cable (not included). In addition, you can also use the TUP while charging.

Lightweight and compact

The Nitecore flashlight can be carried with you at all times, thanks to its lightweight and compact design. The TUP weighs only 53.2 g and its dimensions are 70.3 x 29.5 x 26.2 mm. In addition, the included clip allows you to attach it to a pocket, or the peak of a hat.

Durable

The TUP model was designed with everyday use in mind. The flashlight is made of shatterproof aluminum alloy, and the charging port is covered to prevent damage. In addition, the flashlight is protected by IP54 water resistance and resistance to drops of up to 1 meter. What's more, you can attach keys to the end of the stainless steel holder. It comes with a special clasp. Maximum load capacity is 30 kg.
